EDUCATION

B.Tech in Computer Science Echelon Institute of Technology

08/2023 - 05/2026

Faridabad

Diploma in Computer Science DSEU Rajokari Campus

08/2019 - 05/2022

New Delhi

Secondary School Certificate Shivani public school

05/2019

New Delhi

WORK EXPERIENCE

Software Development Intern STEINBOCK

08/2025 - 11/2025

Achievements/Tasks

- Software Development Intern skilled in building responsive frontend web applications using modern frameworks, with hands-on experience in handling backend integration, APIs, clean UI, and performance optimization.

Web Developer Hackathon by Sheryians Coding School

09/2024

Achievements/Tasks

- Worked on frontend projects.
- Rebuilt the Urban Monkey website using HTML, CSS, Locomotive.js, GSAP, and JavaScript, improving animations and responsiveness.
- Reached the final round of the hackathon among competing teams.

IT Support Analyst Trainee PMIT Global

01/2021 - 04/2021

New Delhi

Achievements/Tasks

- Provided primary technical support to customers and end-users.
- Maintained computer networks, provided technical support, and ensured smooth IT operations for clients and internal teams.

SKILLS

Python

Node.js

Express.js

JavaScript

MongoDB

Next.js

CSS3

C/C++

Git

GitHub

React.js

React Native

Docker

PERSONAL PROJECTS

Google Drive Clone

- Built a full-stack file storage and sharing system using Next.js, React, and Appwrite with secure authentication, file uploads, sharing, global search, and real-time storage analytics.

Real-Time Stock Market Platform

- Built a full-stack stock trading insights platform using Next.js, TypeScript, MongoDB, and Inngest.
- Engineered an event-driven financial dashboard with interactive charts, watchlists, personalized email alerts, and AI-based sentiment analysis powered by Finnhub APIs.

Secure URL Shortener

- Developed a secure URL shortener with authentication, custom slug creation, real-time analytics, and advanced link management features (expiry, access controls, password protection)
- Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js)

Audio Classification

- Built an end-to-end audio classifier to detect sounds (dog barks, bird chirps) using CNNs with ResNet and Mel Spectrograms, and developed a Next.js dashboard to upload audio and visualize model layers.
- Designed and trained the model using **PyTorch**

POV AI Thumbnail Generator (04/2025)

- Developed and deployed a SaaS application that automatically generates POV-style YouTube thumbnails

CERTIFICATES

React.js (08/2021)

Sololearn

Sheryians Hackathon Certificate (09/2024)
